

INTERNATIONAL CONFERENCE ON DIGITAL TECHNOLOGY IN THE 21ST CENTURY

theme

**DIGITAL TECHNOLOGY AND ACADEMIC
PERFORMANCE OF HIGHER LEARNING IN AFRICA**

CALL FOR PAPERS

Digital technology has become a transformative force in higher education across Africa, reshaping how students learn, access information, and engage with academic content. The increasing adoption of digital tools such as e-learning platforms, virtual classrooms, educational mobile applications, and digital libraries has expanded learning opportunities beyond the traditional classroom setting. These technologies have enhanced flexibility, allowing students to study at their own pace, collaborate with peers across borders, and access a wealth of global academic resources. Governments and institutions across the continent are also investing in digital infrastructure and ICT integration to improve teaching effectiveness, research capacity, and overall institutional competitiveness in the global education landscape. Despite these advancements, the impact of digital technology on academic performance in African higher institutions is shaped by several contextual factors. Challenges such as limited internet connectivity, high data costs, inadequate ICT facilities, and insufficient digital skills among students and lecturers often hinder effective utilization of digital tools. Nonetheless, where digital resources are well implemented, evidence shows improvements in student engagement, knowledge retention, assessment outcomes, and overall academic achievement. Therefore, digital technology continues to hold significant potential for enhancing academic performance in higher learning across Africa, provided that infrastructural gaps, policy support, and capacity-building needs are adequately addressed.

The Research Management Team calls for quality papers on the theme “Digital Technology and Academic Performance in Higher Education of Learning in Africa” billed for 24th to 29th May, 2026 at the University of Ebolowa, and held at ISTAG CAMPUS-YAOUNDE. The paper should be original and empirically solution based

TOPICS:

- Distance Learning Education
- AI Education
- Internet Topology Education
- E-Learning Education
- Digital Leadership Education
- Digital Marketing Education
- Digital Mathematics Education
- Information Communication Technology Education
- Career Development Education
- Digital Literacy Education
- Digital Management Education
- Digital Science Education
- Digital Journalism Education
- Digital Healthcare Education

Chairman Organizing Committee

Pr. Sigismond Hervey MVELE ;

Email : fsegres2025@gmail.com

CONFERENCE FEE :

Local Participants : FCFA 50,000

PG Participants : FCFA 35,000

International Participants : USD 500

24TH TO 29TH MAY, 2026

VENUE: UNIVERSITY OF EBOLOWA,
Holding @ ISTAG CAMPUS-YAOUNDE

Submission: 2nd Jan. to 28th February 2026

Full Paper Submission: 1st to 30 March, 2026

Registration: 1st to 30th April, 2026

Registration fee will be made electronically via our International Correspondence Bank upon the acceptance of the abstract and submission of full paper. Each scholar will be communicated officially.
